## SurfTab<sup>®</sup> breeze 7.0

### 7" Android™-Tablet with single core CPU, 4 GB memory and 512 MB RAM

Read e-mails, call friends using video calling, surf the Internet, watch movies, and much more. The TrekStor SurfTab<sup>®</sup> breeze 7.0 offers countless possibilities and an intuitive operation by the Android™ 4.0 operating system.

#### Optimized 1.2 GHz processor

Due to the fast 1.2 GHz processor and 512 MB of RAM, you can easily operate multiple applications at the same time.

#### Android™ 4.0 Operating System

Android 4.0 (Ice Cream Sandwich) for the latest generation devices offers numerous smart features and settings – perfectly tailored to your tablet PC.

#### 5-Point multi-touch Display

The bright 7" (17.78 cm, 16:9) large display impresses by brilliant colors and quick response. The 5-point multi-touch interface allows for intuitive operation and offers a high-resolution display in 800 x 480 pixels.

#### Thin and light

With only 337 grams of weight, the tablet is easy to carry and is very slim with only 12 mm. The textured back provides a firm grip, so that the SurfTab is always safe in your hands.

#### Webcam

Thanks to the built-in front camera, the tablet is best suited for video calling and conferencing.

#### App Center with thousands of Apps

Using App Center, you can expand your tablet with countless applications, games and eBooks. Whether for business or pleasure: this is suitable for everyone.

#### Card slot and USB-Host Port

The SurfTab breeze 7.0 offers enough internal memory for your data, such as music albums or eBooks. If the internal memory is not sufficient, then it can be expanded (up to 32 GB) with the help of a microSD / microSDHC card or other USB device through USB-host port.

#### Wireless networks with fast WLAN

Due to the WLAN standards 802.11 b/g/n, you can surf at high speed through the Internet.

#### Multimedia in HD and Gaming fun

The wide format support lets you play the most image, audio and video file formats in HD resolution, like MKV files with H.264 Codec. The powerful 4-core graphics processor Mali-400 MP also supports many sports games and 3D action games.
