

i.Gear Terres

DVB-T stick for iPad and iPhone

Using this DVB-T stick, you can now watch TV directly on your iPhone or iPad!

Simply connect the stick to your device and, using the free app, it instantly turns the device into your mobile TV. With the help of Time-Shift and the Video-Recorder function, you remain very flexible and can choose to watch a program whenever you wish to.

Totally informed

Moreover, EPG (Electronic Program Guide) allows you to keep track of your favorite shows round the clock.
