

TrekStor SmartPhone

UMTS/HSDPA smartphone with Android™ 2.1

Thanks to the 2.1 Android™ software and the fast UMTS/HSDPA connection possibility, you can easily download lots of applications from the Android™ Marketplace and adjust your TrekStor Smartphone according to your individual preferences.

The TrekStor Smartphone convinces both by its appearance and by its content. The 7.1 cm (2.8 inch) TFT touch screen (resistive) with easily usable user interface makes the navigation easy. Many applications offer direct access to social networks like Facebook® or Twitter. Thus you stay up to date, what is happening among your friends and you can also make quick and easy updates on your status. The feature set is completed through the integrated 3.2 megapixel camera, an MP3 player and UKW radio as well as through the built-in WLAN function (supported WLAN standards b/g).

Design

Through the compact size of 106 mm x 57 mm x 14 mm and the low weight of about 110 g, the TrekStor Smartphone lies particularly well inside the hand. The elegant, practical form completes the style of the touch screen smartphone, which is available in either black or white.

3.2 megapixel camera with LED light

At the right moment no digital camera at hand? No problem - the TrekStor Smartphone is going to help: because the user interface based on the camera function makes photographing simple and uncomplicated. A good picture quality is assured as well.

Music

No matter, if MP3, AAC, AMR, MID, M4A or WAV audio

files: with the TrekStor Smartphone you have your favorite music anytime at hand.

Android™

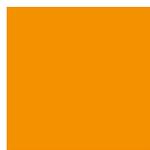

In this way surfing with your smartphone makes fun: Games, weather forecasts, news service and much more – the Android™ Market is the ultimate shopping mall for the TrekStor Smartphone. Besides apps from many different categories, you can also get a huge selection of free applications.

Bluetooth®

Music stored on your smartphone can be transmitted thanks to Bluetooth® to appropriate Bluetooth® stereo headsets or Bluetooth® music speakers and thus allows the full enjoyment of your favorite music.

Memory card slot

Thanks to the possibility of an additional memory expansion (up to 16 GB with microSD/microSDHC cards) you have almost unlimited space for many favorite MP3s, photos or videos. Flexibly and practically the files can be exchanged between compatible devices.
