

USB-Stick QU

Ultra-Speed USB-Stick

The USB-Stick QU in a modern, black design is with its aluminium housing and its blue LED a real highlight among the USB sticks.

Saving, copying and transporting data has never been easier.

The USB-Stick QU is simply connected to the USB port on your computer and acts as an additional drive. You do not need a cable or adapter, no additional power connector and no driver software.

Due to the extremely fast USB 2.0 connection, even large amounts of data are transferred instantly onto the portable memory. Of course, the USB 1.1 port is still supported.

Technical details
