

## SatReceiver Odan S

### DVB-S satellite receiver

The TrekStor SatReceiver Odan S is universell universally applicable and easily handles DVB-S standards. Not only 4000 channels and 8 favorite lists, but also pre-programmed channel lists for an easy setup as well as the option of parental control belong to the TrekStor SatReceiver standard. Thanks to the modern, included infrared remote control and thanks to the clears menus, the SatReceiver is particularly user friendly.

#### MediaPlayer function

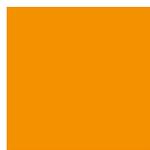

Via the USB 2.0 interface you can transform your DVB-S2 receiver into a multimedia player. Simply connect an external volume (hard drive, USB stick etc.) to the interface and yet you can play the files (videos, photos or music) via your TV.

#### EPG

With the EPG you will never lose the big picture! This electronic program guide shows you an overview of current and future programs with the corresponding transmission times. Depending on the channel, you will receive up to 7 days prior to the current program overview.

#### 2 remote controls included

The TrekStor SatReceiver Odan S comes as a standard with two remote controls. You can then place them in different places in your living room or have an immediate replacement at hand, if one remote control gets lost.

## Technical details
