eBook Player 5

eBook Reader with 5" TFT display, MP3 player and image viewer

Multimedia at its finest
The TrekStor eBook Player 5 with a 5" display has a dull TFT display and an orientation sensor that automatically switches between portrait and landscape format. Additionally, a photo viewer with slide show function and an MP3 player are on board.

Thanks to the exposure of the screen you can read in the dark without an external light, for example while baby-sitting or while the partner is sleeping. Texts in the eBook formats ePUB (incl. Adobe® DRM), PDF and TXT are supported and are displayed in 5 different font sizes and can be enlarged additionally by using the zoom function. An intuitive folder navigation ensures the easy finding of files.

Internal memory and memory expansion
With a capacity of 4 GB, the internal memory offers a lot of space for eBooks, saving you the takeaway of heavy books for holidays. With an integrated card reader the memory is not only expandable with up to 32 GB, but you also have the opportunity, to look at your just shot holiday snapshots via the anti-glare display because the 5" devices read microSD/microSDHC memory cards.
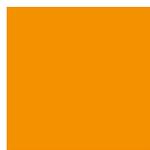

For easy uploading, the device has a copy function, so that the data can be copied without computer directly from the memory card onto the eBook Player. Pictures in the formats JPG, BMP, GIF and PNG can also be displayed with the slideshow function – either with or without background music and thanks to the thumbnail view a mini preview of the image files is possible**.**

Music
The integrated MP3 player offers 9 equalizer settings, ID3 tag display, shuffle function as well as 8 repeat functions. Files with the audio formats MP3, WMA, OGG or WAV can be played via the integrated loud speakers or the 3.5 mm earphone jack. Matching earphones are supplied with the player.

Long reading pleasure
The built-in Li-polymer battery provides up to 8 hours reading and visual pleasure or up to 30 hours of music enjoyment.

Technical details

Hardware

Memory	4 GB
Display type	TFT display
