## IDEOS™ with Google™

## UMTS/HSDPA Smartphone with Android™ 2.2

Thanks to the newest Android™ software and the fast UMTS/HSDPA connectivity, you can easily download lots of applications from the Android™ Marketplace and adjust IDEOS™ with Google™ to your individual preferences.

### Modern, interactive and communicative
The IDEOS™ with Google™ convinces both by its appearance and by its content. The 7.1 cm (2.8 inch) TFT touch screen (capacitive) with an easily usable user interface makes navigation easy. Many applications offer direct access to social networks like Facebook® or Twitter. The integrated Google™ Mobile Suite offers quick access to all Google™ services. So you will stay up to date, what's happening with friends and you can also make quick and easy updates on your status. The feature set is completed through the 3.2 megapixel camera, an MP3-Player and an UKW radio as well as through the integrated WLAN function (supported WLAN standards b/g/n and hotspot function).

### Design
Through the compact size of 104 mm x 55 mm x 13.5 mm and the low weight of about 100 g the IDEOS™ with Google™ lies especially comfortable inside the hand. The elegant, practical shape as well as the chic black complete the style of the touch screen smartphone.

### 3.2 megapixel camera
The integrated camera makes taking along an extra digital camera for you in the future redundant: The user interface of the camera function make photographing easy. The images are taken in very good quality and can then easily be organized with your IDEOS™ with Google™ or can be edited in the photo editor (the IDEOS™ with Google™ generally supports the picture

formats JPG, GIF or PNG).

### Music
No matter, if MP3, AAC, AMR, MID, M4A or OGG audio files: with the IDEOS™ with Google™ you have your favorite music anytime at hand.

### Android™ and Google™ services
That's the way surfing with your smartphone makes fun: Games, weather forcasts, news services and much more – the Android™ Market is the ultimate shopping mall for the IDEOS™ with Google™. Besides more than 30.000 apps of various categories, also a huge selection of free apps is available. In addition, you can directly access the Google search via the surface of the smartphone – by pushing a button all other popular Google services will appear there. Thus you can e. g. use Google™ Talk for instant messaging or access with the help of Google™ Maps route descriptions or city maps.

### Bluetooth® (A2DP)
Music stored on your smartphone can be transmitted thanks to Bluetooth® to appropriate Bluetooth® stereo headsets or Bluetooth® music speakers and thus allows the full enjoyment of your favorite music.

### Memory card slot
Thanks to the possibility of an additional memory expansion (up to 32 GB with microSD/microSDHC card) you have an almost unlimited space for many favorite MP3s, photos or videos (the supported video formats 3GP, 3G2, MP4, WMV are). Flexibly and practically the files can be exchanged between compatible devices.

### WLAN hotspot function
Similarly, there is the possibility to use the IDEOS™ with

## Technical details

### Hardware

| | |
|---|---|
| **Card reader (supported card formats)** | microSD, microSDHC (max. 32 GB) |
| **Interface** | Hi-Speed USB 2.0 (Micro-USB), Memory card reader, Bluetooth® V2.0+EDR |
| **Color** | Black |
| **Dimensions (W x H x D)** | 104 mm x 55 mm x 13.5 mm |
| **Weight** | approx. 100 g (with battery) |
| **Type of housing** | Plastic |

### Record and playback

| | |
|---|---|
| **Playable audio formats** | AAC, AMR, M4A, MID, MP3, WAV |
| **Playable video formats** | 3GP, MP4 |
| **Supported picture formats** | JPEG, GIF, PNG |

### Communication with the PC

| | |
|---|---|
| **Supported operating systems** | Microsoft Windows Vista™, Microsoft Windows® 7, Linux® from Kernel 2.6.x |

### Power

| | |
|---|---|
| **Power supply** | Lithium-polymer battery (3.7V, 1150mAh) |
| **Charge by** | USB port, USB charger |
| **Charging time** | approx. 2, 5 hours |

### Mobile Internet connection

| | |
|---|---|
| **Maximum data transfer rates** | HSDPA (DL): 7.2 MBit/s, UMTS: 384 kBit/s, EDGE packet data: 236.8 kBit/s, GPRS packet data: 85.6 kBit/s |
| **Wi-Fi** | IEEE 802.11g (54 Mbit/s), IEEE 802.11b (11 Mbit/s), IEEE 802.11n (72 Mbit/s) |

### Other characteristics

| | |
|---|---|
| **Package contents** | IDEOS™ with Google™, USB 2.0 cable (Micro-USB (male) / USB-A (male)), Quick guide, Headset, Charger |
| **File management** | Folder navigation |
| **Languages** | English, German, Spanish, Polish, Swedish, Russian, Greek |
