

## SurfTab<sup>®</sup> breeze 10.1 quad

### 10.1" Android™-tablet with quad core CPU, 8 GB memory and 1 GB RAM

We present to you the TrekStor SurfTab breeze 10.1 quad, and ask ourselves if the range of features can truly be called a breeze:

#### **A breeze with a quad-core processor?**

Yes! The brisk quad-core processor with an optimum speed of 1.3 GHz will amaze you with its consistently excellent performance. It is the epitome of a multitasker and masters all challenges with ease.

#### **A breeze with 1 GB of RAM?**

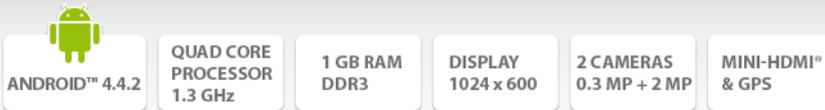

Yes! Because more memory means a smoother gaming experience and an increased workflow. Processes are sped up and run more stably. The ample memory is the perfect complement to the high-performance processor. Together they allow the breeze to offer so much within its compact size: High-resolution videos are played just as smoothly as action and 3D games. The display quality of the 10-inch (17.78-cm) multi-touch screen impresses with brilliant colours and amazing details. Lean back and enjoy!

#### **A breeze with mit HDMI®?**

Yes! The SurfTab breeze 10.1 quad comes equipped with a larger display and a Mini-HDMI port to offer you a great home cinema feature. You therefore get an enjoyable and intense viewing experience when you watch films and series from your online video shop. The breeze naturally includes all interfaces that are relevant for a tablet: A Micro-USB port with USB host function, a microSD/microSDHC card reader and a headphones port are all available. The wireless WiFi and Bluetooth<sup>®</sup> 4.0 interfaces give you the flexibility required to comfortably operate your SurfTab. They allow you to stream your favourite videos and photos. You can listen to your favourite music using Bluetooth headphones or corresponding speakers without getting tangled in hanging cables. Share everything with your friends, acquaintances and all those dear to you. React and respond to all kinds of messages without delay. The two cameras allow you to keep in touch with family and friends via video or to share home-made videos and photos

#### **A breeze with GPS?**

Yes! The SurfTab breeze will guide you to your destination no matter where you are. As soon as you have installed a navigation app on your breeze, the integrated GPS module will navigate you to any desired location. Find your way there with the SurfTab breeze 10.1 quad.

## SurfTab® breeze 10.1 quad

### 10.1" Android™-tablet with quad core CPU, 8 GB memory and 1 GB RAM

#### **A breeze with such a sophisticated design?**

Yes! Not only is the technology good, the breeze looks goods too.

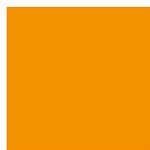

With a thickness of only 7.9 mm, it has model dimensions, and the high-quality aluminium back panel – a new feature for the SurfTab breeze – make this a real designer piece.

What's more, the SurfTab breeze 10.1 quad is also equipped with the latest **Android™** 4.4.2 operating system, allowing you to benefit from the intuitive user interface, a huge selection of apps and a range of options to personalise your SurfTab.

#### **All that and it's still a breeze?**

Yes! This is the largest, fastest and most elegant SurfTab breeze that you can experience at the present time. It's adapted to your requirements, captures the zeitgeist, and is designed for you – the price is unbeatable for the performance it delivers.

**TrekStor. Enjoy now!**
