

USB-Stick DUO

USB flash drive with extra Micro-USB connector for tablet PCs and smartphones

Super convenient, super slim, super compatible - these are the features combined in the TrekStor USB stick DUO. "One for all" one might say, because the USB stick DUO from TrekStor is a mass storage for diverse multimedia devices in your household.

The classic Type A USB port connects it to your computer, laptop, netbook, or TV. The Micro-USB connector simultaneously makes it compatible with your (Windows[®]-/Android[™]-) smartphone or tablet PC, such as those of the TrekStor SurfTab-series. The USB host function allows you to operate freely in all situations: From now on, forget about annoying adapter cables.

Thanks to its pre-formatting, the USB stick DUO, is immediately available for storing your documents and multimedia files or for sharing them with others. Its connections are protected by rugged covers on both sides in order to preserve its ability to function in any situation.

The USB flashdrive comes in a classy brushed-aluminum design.
