

USB-Stick MEMO

USB-Stick with voice recording function

The USB-Stick MEMO offers you the traditional features of a portable data storage and additionally a practical recording function for voice notes.

Wherever you are: Now you will never lose an idea again. With one click on a button, the handy USB-Stick MEMO saves your voice notes. You can listen to the notes via the integrated loudspeaker or copy it easily onto your computer, where they are stored in the popular WMA format.

The USB-Stick MEMO is intuitive and easy to use. Thanks to a sliding switch, you can prevent accidental recording. In standby mode, one touch of a button is enough to start the voice recording. A two-color LED status shows you the receptiveness, the current recording or the playback of voice memos and tells you about the status of the installed batteries.

The USB-Stick MEMO has a retractable Hi-Speed USB 2.0 port and can thus be easily connected to the computer. You do not need a cable or adapter, no additional power connector and no driver software. With a load of lithium polymer batteries, you can record up to 2:15 hours or playback voice recording up to 3:20 hours.

The TrekStor USB-Stick MEMO is already preformatted and without driver immediately ready for use. Supported operating systems are Microsoft Windows[®] 7 / Vista[™] / XP / 2000, Mac[®] OS X from 10.3.x, Linux[®] from Kernel 2.6.x.
